NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian dollars) OCTOBER 31, 2008

1. NATURE AND CONTINUANCE OF OPERATIONS

Colombian Mines Corporation's ("Colombian" or the "Company") principal business activities are the acquisition, exploration and development of mineral properties in Colombia. The recovery of the Company's investment in resource properties and attainment of profitable operations is principally dependent upon financing being arranged by the Company to continue operations, explore and develop the resource properties and the discovery, development and sale of ore reserves. The outcome of these matters cannot presently be determined because they are contingent on future events. These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to meet is obligations and continue its operations for its next fiscal year.

Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. The Company's continuing operations and the ability of the Company to meet its mineral property commitments are dependent upon the support of future joint venture partners and the ability of the Company to raise additional financing. Colombian's mineral exploration activities are located in an emerging nation and consequently, may be subject to a higher level of risk compared to other developed countries. Operations, the status of mineral property rights and the recoverability of investments in emerging nations can be affected by changing economic, regulatory and political situations.

2. BASIS OF PRESENTATION

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, the accompanying financial information reflects all adjustments, consisting primarily of normal and recurring adjustments considered necessary for fair presentation of the results for the interim period. Operating results for the six months ended October 31, 2008 are not necessarily indicative of the results that may be expected for the year ending April 30, 2009. These interim consolidated financial statements follow the same accounting policies as set out in Note 2 to the audited consolidated financial statements of the Company for the year ended April 30, 2008. Accordingly, these financial statements should be read in conjunction with the 2008 annual audited consolidated financial statements and notes thereto. These accounting policies have been consistently applied in the preparation of these interim financial statements except that the Company has adopted the following CICA guidelines effective May 1, 2008:

Capital Disclosures

CICA Handbook Section 1535, Capital Disclosures, establishes standards for disclosing information about the Company's objectives, policies and processes for managing capital. This information is disclosed in note 10.

Financial Instruments Disclosures

CICA Handbook Section 3862, Financial Instruments – Disclosures and Handbook Section 3863, Financial Instruments – Presentation, require entities to provide disclosure of quantitative and qualitative information in their financial statements that enable users to evaluate (a) the significance of financial instruments for the company's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the company is exposed during the period and at the balance sheet date, and management's objectives, policies and procedures for managing such risks. This information is disclosed in note 11.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in Canadian dollars)

OCTOBER 31, 2008

2. BASIS OF PRESENTATION (continued)

General Standards on Financial Statements

CICA Handbook Section 1400, General Standards on Financial Statements Presentation, has been amended to include requirements to assess and disclose a company's ability to continue as a going concern.

International Financial Reporting Standards ("IFRS")

In January 2006, the AcSB announced that accounting standards in Canada are to converge with IFRS. The AcSB has indicated that Canadian companies will need to begin reporting under IFRS by the first quarter of 2011 with appropriate comparative data from the prior year. Under IFRS, the primary audience is capital markets and as a result, there is significantly more disclosure required, specifically for quarterly reporting. Further, while IFRS uses a conceptual framework similar to Canadian GAAP, there are significant differences in accounting policy which must be addressed. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

3. EQUIPMENT

		October 31, 2008 April 30, 2008

Equipment	\$ 412.822	\$ 122,208	\$ 290.614	9	6 430.884	\$ 80.007	\$ 350.877

4. MINERAL PROPERTIES AND EXPLORATION EXPENDITURES

Mineral Properties

The Company, through its subsidiary, Corporacion Minera de Colombia S.A., ("Minera Colombia") has acquired options on the Yarumalito, Guayabales and Gachala properties and a 50% interest in the Otu mining concession contract. In the six months ended October 31, 2008, Colombian has made option payments of \$59,617 on the Guayabales property. The Company has capitalized mineral property acquisition costs as follows:

	October 31, 2008	April 30, 2008
Yarumalito	\$ 407,744	\$ 407,744
Guayabales	271,761	212,144
Gachala	21,381	21,381
Otu	58,071	58,071
	\$ 758,957	\$ 699,340

May 27/08 Private Placement	950,000	1.20	May 27, 2010
	3,962,000		

In October 2008, 520,000 Class A warrants and 111,200 finders' warrants expired unexercised.

7. SEGMENTED INFORMATION

The Company operates in a single business segment, mineral exploration. The Company is currently operating in only one geographic area which is Colombia.

8. SUPPLEMENTARY CASH FLOW INFORMATION

For the six months ended October 31, 2008, Colombian received cash for interest income of \$25,835 (2007 - \$17,925).

9. COMMITMENTS

The Company has two one-year lease agreements in Colombia for office space and field operations. Both leases run from March 1, 2008 to February 28, 2009. The total outstanding commitment on these leases at October 31, 2008 was \$22,683.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian dollars)

OCTOBER 31, 2008

10. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its mineral properties. Colombian relies mainly on equity issuances to raise new capital. The Company's business model is to enter joint venture agreements on certain properties which will enable it to conserve capital and to reduce risk. In the management of capital, the Company includes the components of shareholders' equity as well as cash. The Company estimates exploration expenditures to ensure that there is sufficient capital on hand to meet ongoing obligations. The Company's investment policy is to invest its cash in highly liquid short-term deposits with terms of one year or less and which can be liquidated after thirty days without interest penalty. The Company currently has sufficient capital to fund its exploration programs and to cover its administrative costs for the next twelve months and accordingly these financial statements have been prepared on a going-concern basis.

11. MANAGEMENT OF FINANCIAL RISK

The Company's financial instruments are exposed to certain financial risks, which include currency risk, credit risk, liquidity risk and interest rate risk.

(a) Currency Risk

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates in Canada and Colombia. The Company funds cash calls to its subsidiary company outside of Canada in US dollars and a portion of its expenditures are also incurred in Colombian pesos. The greatest risk is the exchange rate of the Canadian dollar relative to the Colombian peso and a significant change in this rate could have an effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations. At October 31, 2008, the Company is exposed to currency risk through the following assets and liabilities denominated in Colombian pesos:

	Colombian Pesos
Cash and cash equivalents	605,085,200
Receivables	581,263,600
Accounts payable and accrued liabilities	(154,741,400)
Net exposure	1,031,607,400

Based on the above net exposure as at October 31, 2008, and assuming that all other variables remain constant, a 1% change in the value of the Canadian dollar against the Colombian peso would result in an increase / decrease of approximately \$5,200 in the loss from operations. The Colombian peso exchange rate at October 31, 2008 was 1,977 Colombian pesos to the Canadian dollar.

(b) Credit Risk

The Company's cash and cash equivalents are mainly held through a large Canadian financial institution and at October 31, 2008 are mainly cash in guaranteed investment certificates and accordingly credit risk is minimized. The Company's receivables are mainly expenditure recoveries from third parties.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian dollars) OCTOBER 31, 2008

11. MANAGEMENT OF FINANCIAL RISK (Continued)

(c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital resources as outlined in note 10.

(d) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company's cash is held mainly in interest bearing accounts and therefore there is currently minimal interest rate risk.
